

nommie

Sharing recipes of home cooking

Goal: documenting homemade creations and sharing with others

features:

- making username + account
- uploading images
 - ↳ adding text
- AI feature that breaks down a macros estimate
 - ↳ tags things as high protein or high fiber
- does not have to entertain high nutritional value
 - ↳ could be used as a baking recipes, cocktail recipes, comfort foods, coffee recipe, OR health, gym-focused recipes
- adding recipe to homefeed and able to upload a recipe to other platforms → export it as a custom recipe card
 - ↳ this will be a signature look and will also indirectly promote the app
 - ↳ be able to change themes to your preference
 - ↳ every card will be topped by the slogan: "Plated by: @username"
- social feature won't be implemented into app but I will design how it looks in Figma and provide explanation

- story vs. square image export options
- theme selections
- polaroid appearance

maybe make that there like a signature

App Identity

- warm colors; cozy like sunlight on a Sunday morning
- not overwhelming
- hand written; cookbook / journal
- some sort of unique visual identity for the user
 - ↳ QR code for adding users
 - ↳ stamp next to the "plated by"
- color palette:
- fonts
